

COVID-19 Prevention Program (CPP)

St. John Eudes School
Chatsworth, CA

Update: August 23, 2021

COVID-19 Prevention Program (CPP) for St. John Eudes School in Chatsworth, CA

This CPP is designed to control employees' exposures to the SARS-CoV-2 virus (COVID-19) that may occur in our workplace.

Date: August 23, 2021

Authority and Responsibility

Monica Lucariello, Principal has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Identification and Evaluation of COVID-19 Hazards

We implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Document the vaccination status of our employees by using **Appendix E: Documentation of Employee COVID-19 Vaccination Status**, which is maintained as a confidential medical record.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Develop COVID-19 policies and procedures to respond effectively and immediately to individuals at the workplace who are a COVID-19 case to prevent or reduce the risk of transmission in the workplace such as: following the Exposure Management protocols of close contacts and contact tracing, following quarantine protocols as deemed by Public Health.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/ OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections** form as needed to identify and evaluate unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.
- St. John Eudes School will continue to actively monitor developments in our school community as well as ensure that the school keeps up to date with information from state and local health authorities.

Employee participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by: conducting health screenings of their students on a daily basis, as well as temperature checks, monitoring student health and well-being and sending students to the Health Office when they have symptoms. Notifying the administration of any concerns.

Employee screening

We screen our employees and respond to those with COVID-19 symptoms by: All employees are self-screened according to CDPH guidelines. Vaccination status of employees is known, and those who are unvaccinated are to provide a negative Covid test weekly to admin. If an employee presents with signs of symptoms of Covid-19, they are asked to stay home, get tested and follow doctors orders. Any employee with a temperature of 100 for above will be required to stay home. Non-contact thermometers are used.

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures are documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows:

- The Administration will be consistently monitoring the school premises to ensure safety at all times.
- The Administration will address hazards or concerns when reported.
- The severity of the hazard or concern will be assessed and corrections will be made as soon as feasibly possible.

Control of COVID-19 Hazards

Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by all employees and non-employees whether fully vaccinated or not and are worn at all times and where required by orders from the California Department of Public Health (CDPH). St. John Eudes has purchased Personal Protective Equipment (PPE) and also received PPE from the State of California for faculty and staff. Disposable and cloth face masks are available in the Health Office as needed. Faculty and staff have received two, 3-ply face masks with the school logo that contains an antibacterial filter layer for more protection. Teachers and staff attending in-person instruction are encouraged to have extra face masks with them. Any vendors or visitors who come to the office or school campus will not be permitted without a face covering. A face mask will be offered to those who come to campus and do not have a face covering.

Employees required to wear face coverings in our workplace may remove them under the following conditions:

- When an employee is alone in a room or a vehicle.
- While eating or drinking at the workplace, provided employees are at least three feet apart and outside air supply to the area, if indoors, has been maximized to the extent feasible.
- Employees are required to wear respirators in accordance with our respirator program that meets section 5144 requirements.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Such employees will wear an effective, non-restrictive alternative, such as a face shield with a drape on the bottom, if their condition permits it.
- Specific tasks that cannot feasibly be performed with a face covering, where employees will be kept at least six feet apart. This exception is limited to the time in which such tasks are being performed.

Any employee not wearing a required face covering or allowed non-restrictive alternative, will be at least six feet apart from all other persons unless the unmasked employee is either fully vaccinated or tested at least weekly for COVID-19.

We will not prevent any employee from wearing a face covering when it is not required unless it would create a safety hazard, such as interfering with the safe operation of equipment.

Face coverings will also be provided to any employee that requests one, regardless of their vaccination status.

Engineering controls

For indoor locations, using Appendix B, we identify and evaluate how to maximize, to the extent feasible, ventilation with outdoor air using the highest filtration efficiency compatible with our existing ventilation system, and whether the use of portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems, would reduce the risk of transmission by:

- When there is extreme weather conditions, all classrooms and office spaces have air purifiers within the HVAC system that utilizes Needle Point Bi-polar Ionization (NPBI) technology to assist in deactivating up to 99.4% of the pathogens in the breathing zone.
- If the HVAC unit is not in use, doors and/or windows will be opened for ventilation.
- All classrooms and office spaces have portable air purifiers to use in conjunction with the open doors and/or window.
- The HVAC units have filters that have been installed with the filtration efficiency to the highest level compatible with the existing ventilation system.
- The HVAC units are maintained regularly by a third party professional vendor.

Cleaning and disinfecting

We implement the following cleaning and disinfection measures for frequently touched surfaces: St. John Eudes School teachers and staff will clean and disinfect frequently used high touch areas after student use. In addition, the school has outsourced a custodial company that comes daily in the evenings to disinfect all classrooms and office spaces.

- All classrooms have hands free censored hand sanitizers.
- While doors are closed HVAC iWave air circulation is used.
- Every classroom is equipped with portable air purifiers.
- Vendor checked and regularly maintained air filters are of the highest efficiency.
- Drinking fountain closed - water bottles only.
 1. Only refilling water bottle station is permitted.
 2. In the event that a student does not have a water bottle, the school will provide one to the student.
 3. Steps will be taken to ensure that all water systems are safe to use after prolonged non-use.
- Regular cleaning between student and staff use, as needed.
- Using EPA approved cleaning agents, including janitorial/custodial.
- PPE provided to students, faculty, staff, and visitors, as needed.
- Proper storage of cleaning agents.
- Thorough nightly disinfecting.
- Hand sanitizer, disinfecting wipes, and cleaning supplies are available in every classroom and office.
- Sharing of equipment and supplies is avoided where possible. Should equipment need to be shared, it must be sanitized before and after each use.

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

The classroom or office space will be closed until the custodial staff is able to properly disinfect the entire area. The custodial staff is a licensed, bonded, and insured outside vendor that keeps up with the latest information on ways to combat Covid 19 and has trained their employees to use EPA approved surface disinfectant sprays to sanitize. Once sanitized and disinfected, the space will be ready and safe to use by the next school day,

Hand sanitizing

To implement effective hand sanitizing procedures, we:

- Expect teachers and staff to use hand sanitizer every time they enter and exit the classroom.
- Expect teachers and staff to assist in wiping down their own desk by using disinfectant wipes or sprays.
- Expect teachers and staff to wash their hands, rubbing thoroughly, for at least 20 seconds with the antibacterial soap and dry their hands thoroughly with the single-use paper towels provided in the bathrooms and after recess, lunch, and after restroom use.
- Upgrade all restrooms to include hands-free antibacterial soap dispensers and hands-free paper towel dispensers for all to use.
- Upgrade all classrooms to include hands-free hand sanitizer that does not contain methanol or methyl alcohol.
- Placed signage with safety reminders in many places around the school campus.

Personal protective equipment (PPE) used to control employees' exposure to COVID-19

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by section 3380, and provide and ensure use of such PPE as needed.

Upon request, we provide respirators for voluntary use to all employees who are not fully vaccinated and who are working indoors or in vehicles with more than one person.

We provide and ensure use of respirators in compliance with section 5144 when deemed necessary by Cal/OSHA.

Testing of symptomatic employees

We ask symptomatic employees to take a COVID-19 test which is readily available at many nearby clinics.

Investigating and Responding to COVID-19 Cases

We have developed effective procedures to investigate COVID-19 cases that include seeking information from our employees regarding COVID-19 cases, close contacts, test results, and onset of symptoms. This is accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

We also ensure the following is implemented:

- Employees who had potential Covid-19 exposure in our workplace will be sent home with instructions to get tested for Covid-19 on the 5th day, at the earliest, from exposure. If the employee test negative, is vaccinated, and has no symptoms, they may return to work after the 7th day from possible exposure and must continue to watch for symptoms through day 10. Testing can be accessed at no additional cost through the county and locations will be provided to the employee, but if an employee would prefer to go through their one insurance for testing, they may do so. If an employee chooses not to get tested, they may get clearance from a medical doctor to return to work, but if they choose not to seek medical advice, the employee must self-quarantine for 10 full days before returning to work, as long as they continue to be symptom free. Employees must report health status to the administration at all times.

System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Employees should report Covid-19 symptoms and possible hazards directly to the Administration immediately and also by completing the daily self-screening and temperature check.
- Employees can report symptoms, possible close contacts and hazards without fear of reprisal.
- Procedures and policies are in place for accommodating employees with medical or other conditions that put them at increased risk of severe Covid-19 illness.
- Access to COVID-19 testing when testing is required.
- Any positive cases will be reported following local and state guidelines and protocols, as well as to the Covid Response Team for the Archdiocese of Los Angeles.

Training and Instruction

We provide effective employee training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards, and how to participate in the identification and evaluation of COVID-19 hazards.
- Information regarding COVID-19-related benefits (including mandated sick and vaccination leave) to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing, face coverings, increased ventilation indoors, and respiratory protection decrease the spread of COVID-19 and are most effective when used in combination.
- The right of employees that are not fully vaccinated to request a respirator for voluntary use, without fear of retaliation, and our policies for providing the respirators. Employees voluntarily using respirators will be trained according to section 5144(c)(2) requirements:
 - How to properly wear them.
 - How to perform a seal check according to the manufacturer's instructions each time a respirator is worn, and the fact that facial hair can interfere with a seal.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment. Since COVID-19 is an airborne disease, N95s and more protective respirators protect the users from airborne disease, while face coverings primarily protect people around the user.
 - The conditions where face coverings must be worn at the workplace.
 - That face coverings are additionally recommended outdoors for people who are not fully vaccinated if six feet of distance cannot be maintained.
 - Employees can request face coverings and can wear them at work regardless of vaccination status and without fear of retaliation.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- Information on our COVID-19 policies and how to access COVID-19 testing and vaccination, and the fact that vaccination is effective at preventing COVID-19, protecting against both transmission and serious illness or death.
- The administration regularly updates the faculty and staff via email, faculty meetings, text, etc. on the latest guidelines and requirements.
-

Appendix D: COVID-19 Training Roster will be used to document this training.

Exclusion of COVID-19 Cases and Employees who had a Close Contact

Where we have a COVID-19 case or close contact in our workplace, we limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements

are met.

- Excluding employees that had a close contact from the workplace until our return-to-work criteria have been met, with the following exceptions:
 - Employees who were fully vaccinated before the close contact and who do not develop COVID-19 symptoms.
 - COVID-19 cases who returned to work per our return-to-work criteria and have remained free of COVID-19 symptoms, for 90 days after the initial onset of COVID-19 symptoms, or for COVID-19 cases who never developed COVID-19 symptoms, for 90 days after the first positive test.
- For employees excluded from work, continuing, and maintaining employees' earnings, wages, seniority, and all other employees' rights and benefits. This will be accomplished by employer-provided employee sick leave benefits, payments from public sources or other means of maintaining earnings, rights and benefits, where permitted by law and when not covered by workers' compensation.
- Providing employees at the time of exclusion with information on available benefits.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases and outbreaks at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

Return-to-Work Criteria

- **COVID-19 cases with symptoms** will not return to work until all the following have occurred:
 - At least 24 hours have passed since a fever of 100.4 °F. or higher has resolved without the use of fever-reducing medications, and
 - COVID-19 symptoms have improved, and
 - At least 10 days have passed since COVID-19 symptoms first appeared.
- **COVID-19 cases who tested positive but never developed symptoms** will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work once the requirements for "cases with symptoms" or "cases who tested positive but never developed symptoms" (above) have been met.
- Persons who had a close contact may return to work as follows:
 - Close contact but never developed symptoms: when 10 days have passed since the last known close contact.
 - Close contact with symptoms: when the "cases with symptoms" criteria (above) have been met, unless the following are true:
 - The person tested negative for COVID-19 using a polymerase chain reaction (PCR) COVID-19 test with specimen taken after the onset of symptoms; and
 - At least 10 days have passed since the last known close contact, and
 - The person has been symptom-free for at least 24 hours, without using fever-reducing medications.
 - If an order to isolate, quarantine, or exclude an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or

quarantine is completed or the order is lifted.

Monica Lucariello
Principal
St. John Eudes School
Chatsworth, CA 91311
(818) 341 - 1454
email: mlucariello@stjohneudes.org
August 23, 2021

Appendix A: Identification of COVID-19 Hazards

All persons, regardless of symptoms or negative COVID-19 test results, will be considered potentially infectious. Particular attention will be paid to areas where people may congregate or come in contact with one another, regardless of whether employees are performing an assigned work task or not. For example: meetings, trainings, entrances, bathrooms, hallways, aisles, walkways, elevators, break or eating areas, cool-down areas, and waiting areas.

Evaluation of potential workplace exposure will be to all persons at the workplace or who may enter the workplace, including coworkers, employees of other entities, members of the public, customers or clients, and independent contractors. We will consider how employees and other persons enter, leave, and travel through the workplace, in addition to addressing stationary work.

Person conducting the evaluation: Monica Lucariello

Date: August 23, 2021

Name(s) of employee and authorized employee representative that participated: Monica Lucariello

Interaction, area, activity, work task, process, equipment and material that potentially exposes employees to COVID-19 hazards	Places and times	Potential for COVID-19 exposures and employees affected, including members of the public and employees of other employers	Existing and/or additional COVID-19 prevention controls
Classrooms, office, faculty lounge/work room, lunch area, restrooms, hall, labs, library, assembly areas, walkway, etc.	During school hours from 7:30am - 4:30pm	None	All safety procedures and protocols are in place and being followed.

Appendix B: COVID-19 Inspections

Date: August 23, 2021

Name of person conducting the inspection: Monica Lucariello

Work location evaluated: St. John Eudes School, Chatsworth, CA

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
Engineering			
Ventilation (amount of fresh air and filtration maximized)	•	Faculty and Staff	
Additional room air filtration	•	Faculty and Staff	
HVAC Units with iWave filters maintained	•	Administration	
Administrative			
Surface cleaning and disinfection (frequently enough and adequate supplies)	•	Faculty and Staff and Custodian	
Hand washing facilities (adequate numbers and supplies)	•	Custodian	
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions	•	Administration and Custodian	

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
Seating charts in classrooms to provide easy contact tracing	●	Teachers and staff	
PPE (not shared, available and being worn)	●	Administration, Faculty and Staff, Health Room Coordinator	
Face coverings (cleaned sufficiently often)	●	Administration	
Gloves	●	Administration and Health Room Coordinator	
Face shields	●	Administrator and Health Room Coordinator	
Signage of safety reminders	●	Administration and Office Staff	
Protocols posted in classroom	●	Administration and Office Staff	

Identify and evaluate how to maximize ventilation with outdoor air; the highest level of filtration efficiency compatible with the existing ventilation system; and whether the use of portable or mounted HEPA filtration units, or other air cleaning systems, would reduce the risk of COVID-19 transmission. Review applicable orders and guidance from the State of California and local health departments related to COVID-19 hazards and prevention have been reviewed, including the CDPH Interim Guidance for Ventilation, Filtrations, and Air Quality in Indoor Environments and information specific to your industry, location, and operations. We maximize the quantity of outside air provided to the extent feasible, except when the United States Environmental Protection Agency (EPA) Air Quality Index is greater than 100 for any pollutant or if opening windows or maximizing outdoor air by other means would cause a hazard to employees, for instance from excessive heat or cold.

Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or persons with COVID-19 symptoms, and any employee required medical records will be kept confidential unless disclosure is required or permitted by law. Un-redacted information on COVID-19 cases will be provided to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH) immediately upon request, and when required by law.

Date:

Name of person conducting the investigation:

Name of COVID-19 case (employee or non-employee*) and contact information:

Occupation (if non-employee*, why they were in the workplace):

Names of employees/representatives involved in the investigation:

Date investigation was initiated:

Locations where the COVID-19 case was present in the workplace during the high-risk exposure period, and activities being performed:

Date and time the COVID-19 case was last present and excluded from the workplace:

Date of the positive or negative test and/or diagnosis:

Date the case first had one or more COVID-19 symptoms, if any:

Information received regarding COVID-19 test results and onset of symptoms (attach documentation):

Summary determination of who may have had a close contact with the COVID-19 case during the high-risk exposure period. Attach additional information, including:

- The names of those found to be in close contact.
- Their vaccination status.
- When testing was offered, including the results and the names of those that were exempt from testing because.
 - They were fully vaccinated before the close contact and do not have symptoms.
 - They returned to work per our return-to-work criteria and have remained symptom free for 90 days or, for those that never developed symptoms, for 90 days after the initial positive test.
- The names of those that were excluded per our Exclusion of COVID-19 Cases and Employees who had a Close Contact requirements.
- The names of those exempt from exclusion requirements because:
 - They were fully vaccinated before the close contact and did not develop COVID-19 symptoms.
 - They returned to work per our return-to-work criteria and have remained symptom free for 90 days or, for those that never developed symptoms, for 90 days after the initial positive test.

Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:

1. All employees who were in close contact
2. Their authorized representatives (If applicable, the notice required by Labor Code section 6409.6(a) (2) and (c))

Names of employees that were notified:	Names of their authorized representatives:	Date

Independent contractors and other employers present at the workplace during the high-risk exposure period.

Names of individuals that were notified:	Date

What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?

What could be done to reduce exposure to COVID-19?

Was local health department notified? Date?

Appendix D: COVID-19 Training Roster

Date: Ongoing

Person that conducted the training: Monica Lucariello

Employee Name	Employee Name
Sylvia Valdez	Esthela Gonzalez
Noelle Gallucci	Frances Funicello
Beatriz Moreno	Traci Banks Elmer Renderos
Leslie Rigney	Sr. Divaelia Moreno
Aileen Vasquez	Nicole Niemiec
Allison Martin	Amanda El Khoury
Ryan Spencer	Cassandra DeBolt
Adriana Mazyck	Merly Uyanga
Genalie Watrin	Ana Tenorio
Tess Yuhico	Esperanza Martin
Jie Prospero	Sheryl Reyes

Additional Consideration #1

Multiple COVID-19 Infections and COVID-19 Outbreaks

[This addendum will need to be added to your CPP if three or more employee COVID-19 cases within an exposed group visited the workplace during their high-risk exposure period at any time during a 14-day period. Reference section [3205.1](#) for details.]

This addendum will stay in effect until there are no new COVID-19 cases detected in the exposed group for a 14-day period.

COVID-19 testing

- We provide COVID-19 testing at no cost to all employees, during paid time, in our exposed group except for:
 - Employees who were not present during the relevant 14-day period.
 - Employees who were fully vaccinated before the multiple infections or outbreak and who do not have symptoms.
 - COVID-19 cases who did not develop symptoms after returning to work pursuant to our return-to-work criteria, no testing is required for 90 days after the initial onset of symptoms or, for COVID-19 cases who never developed symptoms, 90 days after the first positive test.
- COVID-19 testing consists of the following:
 - All employees in our exposed group are immediately tested and then again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine, isolation, or exclusion period required by, or orders issued by, the local health department.
 - After the first two COVID-19 tests, we continue to provide COVID-19 testing once a week of employees in the exposed group who remain at the workplace, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
 - We provide additional testing when deemed necessary by Cal/OSHA.

We continue to comply with the applicable elements of our CPP, as well as the following:

1. Employees in the exposed group wear face coverings when indoors, or when outdoors and less than six feet apart (unless one of the face-covering exceptions indicated in our CPP apply).
2. We give notice to employees in the exposed group of their right to request a respirator for voluntary use if they are not fully vaccinated.
3. We evaluate whether to implement physical distancing of at least six feet between persons, or where six feet of physical distancing is not feasible, the need for use of cleanable solid partitions of sufficient size to reduce COVID-19 transmission.

COVID-19 investigation, review, and hazard correction

We immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review is documented and includes:

- Investigation of new or unabated COVID-19 hazards including:
 - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
 - Our COVID-19 testing policies.
 - Insufficient outdoor air.
 - Insufficient air filtration.
 - Lack of physical distancing.

- Updating the review:
 - Every thirty days that the outbreak continues.
 - In response to new information or to new or previously unrecognized COVID-19 hazards.
 - When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and review. We consider:
 - Moving indoor tasks outdoors or having them performed remotely.
 - Increasing outdoor air supply when work is done indoors.
 - Improving air filtration.
 - Increasing physical distancing as much as feasible.
 - Requiring respiratory protection in compliance with section 5144.
 - **[Describe other applicable controls].**

Buildings or structures with mechanical ventilation

We will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters, if compatible with the ventilation system. If MERV-13 or higher filters are not compatible, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units or other air cleaning systems would reduce the risk of transmission and, if so, implement their use to the degree feasible.

Additional Consideration #2

Major COVID-19 Outbreaks

[This addendum will need to be added to your CPP should 20 or more employee COVID-19 cases in an exposed group visit your workplace during the high-risk exposure period within a 30-day period. Reference section [3205.2](#) for details.]

This addendum will stay in effect until there are fewer than three COVID-19 cases detected in our exposed group for a 14-day period.

We continue to comply with the Multiple COVID-19 Infections and COVID-19 Outbreaks addendum, except that the COVID-19 testing, regardless of vaccination status, is made available to all employees in the exposed group twice a week, or more frequently if recommended by the local health department.

In addition to complying with our CPP and Multiple COVID-19 Infections and COVID-19 Outbreaks addendum, we also:

- Provide employees in the exposed group with respirators for voluntary use in compliance with section 5144(c)(2) and determine the need for a respiratory protection program or changes to an existing respiratory protection program under section 5144 to address COVID-19 hazards.
- Separate by six feet (except where we can demonstrate that six feet of separation is not feasible and there is momentary exposure while persons are in movement) any employees in the exposed group who are not wearing respirators required by us and used in compliance with section 5144. When it is not feasible to maintain a distance of at least six feet, individuals are as far apart as feasible. **[Describe methods used, such as physical distancing that includes: telework or other remote work arrangements; reducing the number of persons in an area at one time, including visitors; visual cues such as signs and floor markings to indicate where employees and others should be located or their direction and path of travel; staggered arrival, departure, work, and break times; and adjusted work processes or procedures, such as reducing production speed, to allow greater distance between employees.]**
- Install cleanable solid partitions that effectively reduce transmission between the employee and other persons at workstations where an employee in the exposed group is assigned to work for an extended period, such as cash registers, desks, and production line stations, and where the physical distancing requirement (described above) is not always maintained.
- Evaluate whether to halt some or all operations at the workplace until COVID-19 hazards have been corrected.
- Implement any other control measures deemed necessary by Cal/OSHA.

Additional Consideration #3

COVID-19 Prevention in Employer-Provided Housing

[This addendum will need to be added to your CPP if you have workers in employer-provided housing. Reference section [3205.3\(a\)](#) for details.]

Assignment of housing units

We, to the extent feasible, reduce employee exposure to COVID-19 by assigning employee residents to distinct groups and ensure that each group remains separate from other such groups during transportation and work. Shared housing unit assignments are prioritized in the following order:

- Residents who usually maintain a household together outside of work, such as family members, will be housed in the same housing unit without other persons.
- Residents who work in the same crew or work together at the same workplace will be housed in the same housing unit without other persons.
- Employees who do not usually maintain a common household, work crew, or workplace will be housed in the same housing unit only when no other housing alternatives are feasible.

Ventilation

We ensure maximization of the quantity and supply of outdoor air and increase filtration efficiency to the highest level compatible with the existing ventilation system in housing units. If there is not a Minimum Efficiency Reporting Value (MERV) 13 or higher filter in use, portable or mounted HEPA filtration units are used, where feasible, in all sleeping areas in which there are two or more residents who are not fully vaccinated.

Face coverings

We provide face coverings to all residents and provide information to residents on when they should be used in accordance with state or local health officer orders or guidance.

Cleaning and disinfection

We ensure that:

- Housing units, kitchens, bathrooms, and common areas are effectively cleaned to prevent the spread of COVID-19. Housing units, kitchens, bathrooms, and indoor common areas are cleaned and disinfected after a COVID-19 case was present during the high-risk exposure period, if another resident will be there within 24 hours of the COVID-19 case. **[Describe how this will be accomplished]**
- Cleaning and disinfecting is done in a manner that protects the privacy of residents.
- Residents are instructed to not share unwashed dishes, drinking glasses, cups, eating utensils, and similar items.

Screening

We encourage residents to report COVID-19 symptoms to **[Enter name of individual, position, or office]**.

COVID-19 testing

We establish, implement, maintain and communicate to residents' effective policies and procedures for COVID-19 testing of residents who had a close contact or COVID-19 symptoms. **[Describe how this will be accomplished]**

COVID-19 cases and close contacts

We:

- Effectively quarantine residents who have had a close contact from all other residents. Effective quarantine includes providing residents who had a close contact with a private bathroom and sleeping area, with the following exceptions:
 - Fully vaccinated residents who do not have symptoms.
 - COVID-19 cases who have met our return-to-work criteria and have remained asymptomatic, for 90 days after the initial onset of symptoms, or COVID-19 cases who never developed symptoms, for 90 days after the first positive test.
- Effectively isolate COVID-19 cases from all residents who are not COVID-19 cases. Effective isolation includes housing COVID-19 cases only with other COVID-19 cases and providing COVID-19 case residents with a sleeping area and bathroom that is not shared by non-COVID-19-case residents.
- Keep confidential any personal identifying information regarding COVID-19 cases and persons with COVID-19 symptoms, in accordance with our CPP **Investigating and Responding to COVID-19 Cases**.
- End isolation in accordance with our CPP **Exclusion of COVID-19 Cases and Return to Work Criteria**, and any applicable local or state health officer orders.

Additional Consideration #4

COVID-19 Prevention in Employer-Provided Transportation

[This addendum will need to be added to your CPP if there is employer-provided motor vehicle transportation, which is any transportation of an employee, during the course and scope of employment, including transportation to and from different workplaces, jobsites, delivery sites, buildings, stores, facilities, and agricultural fields provided, arranged for, or secured by an employer, regardless of the travel distance or duration involved. Reference section [3205.4](#) for details.

This addendum does not apply:

- If the driver and all passengers are from the same household outside of work, such as family members, or if the driver is alone in the vehicle.
- To employer-provided transportation when necessary for emergency response, including firefighting, rescue, and evacuation, and support activities directly aiding response such as utilities, communications and medical operations.
- To employees with occupational exposure as defined by section 5199.
- To vehicles in which all employees are fully vaccinated.
- To public transportation]

Assignment of transportation

To the extent feasible, we reduce exposure to COVID-19 hazards by assigning employees sharing vehicles to distinct groups and ensuring that each group remains separate from other such groups during transportation, during work activities, and in employer-provided housing. We prioritize shared transportation assignments in the following order:

- Employees residing in the same housing unit are transported in the same vehicle.
- Employees working in the same crew or workplace are transported in the same vehicle.
- Employees who do not share the same household, work crew or workplace are transported in the same vehicle only when no other transportation alternatives are feasible.

Face coverings and respirators

We ensure that the:

- Face covering requirements of our CPP **Face Coverings** are followed for employees waiting for transportation, if applicable.
- All employees who are not fully vaccinated are provided with a face covering, which must be worn unless an exception under our CPP Face Coverings applies.
- Upon request, we provide respirators for voluntary use in compliance with subsection 5144(c)(2) to all employees in the vehicle who are not fully vaccinated.

Screening

We develop, implement, and maintain effective procedures for screening and excluding drivers and riders with COVID-19 symptoms prior to boarding shared transportation. **[Detail what those procedures are]**

Cleaning and disinfecting

We ensure that:

- All high-contact surfaces (door handles, seatbelt buckles, armrests, etc.) used by passengers are cleaned to prevent the spread of COVID-19 and are cleaned and disinfected if used by a COVID-19 case during the high-risk exposure period, when the surface will be used by another employee within 24 hours of the COVID-19 case. **[Describe how this will be accomplished]**
- All high-contact surfaces used by drivers, such as the steering wheel, armrests, seatbelt buckles, door handles and shifter, are cleaned to prevent the spread of COVID-19 between different drivers

and are disinfected after use by a COVID-19 case during the high-risk exposure period, if the surface will be used by another employee within 24 hours of the COVID-19 case. **[Describe how this will be accomplished]**

- We provide sanitizing materials, training on how to use them properly, and ensure they are kept in adequate supply.

Ventilation

We ensure that vehicle windows are kept open, and the ventilation system is set to maximize outdoor air and not set to recirculate air. Windows do not have to be kept open if one or more of the following conditions exist:

- The vehicle has functioning air conditioning in use and excessive outdoor heat would create a hazard to employees.
- The vehicle has functioning heating in use and excessive outdoor cold would create a hazard to employees.
- Protection is needed from weather conditions; such as rain or snow.
- The vehicle has a cabin air filter in use and the U.S. EPA Air Quality Index for any pollutant is greater than 100.

Hand hygiene

We provide hand sanitizer in each vehicle and ensure that all drivers and riders sanitize their hands before entering and exiting the vehicle. Hand sanitizers with methyl alcohol are prohibited.
